SUMMARY

Results-driven software engineer with 6+ years building scalable web applications in Python, TypeScript, and React. Led teams of up to 5 engineers, cut API latency by 40%, and shipped products used by 500k+ monthly users.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Go
Frameworks: React, Next.js, FastAPI, Django, Node.js, Tailwind CSS
Tools: Docker, Kubernetes, AWS, PostgreSQL, Redis, Git, CI/CD, Grafana
Practices: REST API design, TDD, Agile/Scrum, system design, code review

EXPERIENCE

Senior Software Engineer - Acme Corp | 2021 - Present
- Led redesign of the payments API serving 2M requests/day, reducing p95 latency from 800ms to 480ms (-40%) through query optimization and Redis caching.
- Mentored 4 junior engineers; introduced code-review checklist that cut bugs reported in production by 30% over two quarters.
- Built a Next.js analytics dashboard adopted by 12 internal teams.

Software Engineer - Beta Startup | 2018 - 2021
- Developed FastAPI microservices with PostgreSQL and Docker, deployed on AWS ECS.
- Implemented CI/CD pipelines (GitHub Actions) that shortened release cycles from weekly to daily deploys.
- Collaborated with product and design to ship 3 customer-facing features that increased activation by 18%.

Software Intern - Gamma Inc. | 2017
- Automated a manual reporting workflow with Python, saving ~10 hours/week.

EDUCATION

B.S. Computer Science - State University | 2014 - 2018 | GPA: 3.7/4.0
Relevant coursework: Data Structures, Operating Systems, Databases, ML Basics

PROJECTS

- OpenBoard (github.com/alexmorgan/openboard): Real-time collaborative whiteboard built with WebSockets and React; 1.2k GitHub stars.
- cli-tools (github.com/alexmorgan/cli-tools): Python CLI utilities package with 95% test coverage, published on PyPI (5k+ downloads).
